

We suggest getting a bicycle box from a cycle shop.. (Or make a new box with sheet cardboard).

As an idea, you may be able to pay your local bike shop to pack (They have the right tools and packing materials - instruct them to tape over handholes)

Standard bike packing method is

- 1) Ensure bike is clean (Dirt, insects, cobwebs, seeds etc are removed)

- 2) Remove pedals and wrap in air cap

- 3) Loosen handlebars

- 4) Lower seat

- 5) Remove front wheel

- 6) Put frame into box.(Tape pedals to frame)

- 7) Air cap between items to prevent scratches

- 8) Aircap front wheel and put into box.
- 9) Tighten handlebars
- 10) Cover any remaining items with aircap to prevent scratches
- 11) Anti absorbent (optional)
- 12) Seal box, and PP Band (To assist with safe lifting and handling)
- 13) Affix Shipping mark.

Bike Box

Bike box pp banded (awaiting shipping mark)

Handholes must be taped over
